SWINNERTON'S

500,000 POUNDS OF NEW MEXICO AT 48¢ CLEAN

One Lot of Original Estimated at Fifty Cents Reported by Boston Wool Review of Past Week.

MARKET GENERALLY IN HEALTHY CONDITION

Boston, Mass., Jan. 16.—The wool market is healthy and sustained. As compared with a week ago, it is doubtful if prices are specially higher. Although in instances fractional advances may have been obtained it is likewise true that certain sales have been made at slight concessions from asking prices. Fine wools here and abroad are relatively stronger than medium or lower grades. On the whole, the world over, prices are still on the upward trend, says the Boston Commercial Bulletin, in its review of last week's business.

Sales in the local markets have been for the most part of the same character as in other recent weeks. Demand has centered chiefly upon domestic territories of the fine and fine medium order, although there has been more or less of the coarser wool said, too.—Sampling is being generally indulged in by the manufacturers and while sales have not been heavy there is evident a very general interest in all classes of foreign wool and some fair sales have been made. Altogether there has been a moderately good business done during this week.

The Goods Situation.—Some reports from the goods market are encouraging. Woolen coverings of domestic manufacture are said to be meeting with favor among the clothiers. A large factor in the trade is said to have made good sales in chinchillas and shawlings of overcoatings, generally as compared with foreign-made goods are much in favor of domestic cloths in general appearance and get up with prices only slightly in favor of the foreign-made goods, if at all. Of course, the ready-made garment problem will have a large bearing on the whole question of foreign-made versus domestic-made goods, but it is significant that, while domestic manufacturers are not "out of the woods" by any means as yet, they are more hopeful and are backing up their hopes with purchases of wool.

Showings of medium staple wools and fine medium wools have been of fairly good proportions this week, running well up towards three million pounds. Over a half million pounds of graded Montana wool is reported to have been sold in one month at 18¢ to 18½ cents for half-blood clothing; 19¢ to 20 cents for three-eighths; 18¢ and 19½ cents for fine and half-blood staples, respectively. Some other fine and half-blood staples Montana is reported at one-half cent less. Fine clothing Montana has again been sold at 17 cents.

Several lots of original wool have also changed hands. One house reports the sale of about one-half million pounds of original New Mexican at a clean cost of 45¢ to 48 cents, one lot even being estimated to cost clean as much as 50 cents. Several hundred thousand pounds of other clothing wools are reported sold including fine and medium Utahs at 47¢ to 48 cents for the best wools, Wyoming in about the same range, Dakotas, Idaho, etc.

About a quarter million pounds of low combing sorts, including combed and braid, low quarter and quarter territories is reported to have been purchased at different points throughout the market at about 19 cents.

Dress goods will probably be opened about the first of February.

London Offerings Declined.—At the first series of 1914 auctions in Coleman Street, London, which opens next Tuesday, total offerings will amount to 139,000 bales. Of this quantity, 12,000 bales only will be New Zealand wools. At the corresponding sales last year, 139,000 bales was the total offered. A leading importer, now in London, cables: "Prices point to unchanged prices."

Australia Reopens Higher.—The first post-holiday sale in Australia at Sydney, which held a three days' sale on Monday, opened at a slight advance, particularly on fine outer wools of about 2½ per cent. The market closed firm at the advance, competition having been good. According to one importer, choice wools will cost, landed, from this date, 62 cents; average 59¢ to 60 cents; choice 64¢, 55 cents and average 61¢, 56 cents. Next week there will be offered 45,000 bales. Melbourne reopened January 15th.

New Zealand Against Boyer.—New Zealand markets, which responded for the post-holiday sales last week Friday at Napier, were strong and prices were occasionally a half-penny higher. The wool was in excellent condition and competition was keen and general. Offerings were 15,000 bales at Wellington last Wednesday, of which were 12,000 bales. Wools were well grown, sound and light in condition, but more or less sandy and rather broadly clasped. Competition was generally keen, 48¢ to 55¢ selling at

FOR RENT

\$20.00—3 room modern brick, 112 South Eighth street.
\$27.50—8 room modern brick, Eighth and Cooper.
\$22.50—5 room modern brick, Thirteenth and Fruit.

weather conditions—that one year may be good, the next fair, and now and then a bad one.

Realizing these facts the farmers are turning their attention to dairy cattle and poultry and hogs. The last two naturally follow the coming of the dairy cow.

Then following the coming of the cow is the creamery. Roswell has two—the Roswell creamery and Berrendo creamery. The city creamery is making and shipping several hundreds of pounds of butter a week.

The Berrendo creamery, owned and controlled by Otis and Orl brothers is new. As yet they are only putting out 150 pounds of butter a week, but have a capacity of 300 pounds a day. There are only 160 milking cows on the Berrendo farm, but this is increasing rapidly and it is thought that within a year there will be a thousand milking cows on the Berrendo Irrigated Farms alone.

The Berrendo creamery is a model of cleanliness. Though small the company has arranged so that any time it can be easily enlarged.

They have arranged to pay 31 cents and 32 cents per pound the year round for butter fat. The Elgin market quotation will not predominate. This is done so that the farmers will know right along what they are to receive and depend on it.

As an instance of what is being done regarding profits in the dairying game, Lowe & Wilson with five cows, all shorthorns, got for their butter fat, 76.44 pounds at 32 cents a pound, \$2.60. This is besides the skimmed milk which they sell at 50 cents a hundred pounds for feeding hogs and calves. Others are doing as well.

They have arranged to pay 31 cents and 32 cents per pound the year round for butter fat. The Elgin market quotation will not predominate. This is done so that the farmers will know right along what they are to receive and depend on it.
